CitiXsys Newsletter
February 2008

Greetings!

There's always something new at CitiXsys!

And that's our constant effort to provide all our partners/customers a more value driven and focused solution to address their business needs. Moving forward you will be seeing new sections added to our Newsletter. Some of these will include latest product and service updates, what our customers are saying about us, tips on what services we offer, special promotions, and useful information to make you more aware about CitiXsys service and solution offerings.

The aim? To enhance and enrich every step of your engagement experience with us and to equip you with the right knowledge to effectively use our products.

Happy Reading!

Best Wishes,
Kamal Karmakar
CEO,
CitiXsys Americas Inc

Services

- ✓ SAP Business One Implementation
- ✓ mySAP-SAP Business One Integration
- ✓ InterCompany Consolidation
- ✓ Enterprise Integration
- ✓ Bespoke Development

PRODUCT NEWS

Special Feature on Warehouse Management Solution from CitiXsys - RF Integration

If you are looking to manage and track the movement of inventory from receiving to shipping; cut down warehouse costs by eliminating paper work and costly shipping errors or looking to provide accurate inventory levels to all inter-company departments - **Warehouse Management** from CitiXsys provides you the optimal flexibility and conformance for your warehouse environment.

Tightly integrated with SAP® Business One your company can significantly reduce costs and increase customer satisfaction. The Warehouse Management System (WMS) encompasses the day-to-day transactions that run a warehouse with fully integrated data collection technologies, such as bar code scanning, bar code printing, and wireless mobile data collection. A typical warehouse system includes picking, packing, put away, shipping, receiving and several warehousing and inventory management features. Customers can have WMS implemented with automatic data collection in the form of Radio Frequency (RF) portable terminals with bar code scanners. The WMS application can be accessed from a Radio Frequency (RF) hand-held device and supports multiple RF Hardware Platforms including Symbol Technologies and Zebra.

Radio Frequency (RF) integration with WMS provide users the option to use RF handheld devices and manage their warehouse in a much more efficient way as it saves time, eliminates the use of paper and increases the accuracy in performing day to day warehouse activities. There are currently 4 modules (Receiving, Inventory, Order Fulfillment and Shipping) which are integrated with RF. To find out more about our robust Warehouse Management Solution, attend a demo, visit our website for more product information or contact our Product Specialist listed below.

Hardware Requirements for WMS

Computer Processor: 1 GHz or faster Pentium-compatible processor
Memory: 1 GB recommended
Free Disk Space: At least 1 GB
Display: VGA or higher-resolution monitor
Peripheral: Keyboard and Mouse or compatible pointing device

Software Requirements for WMS

SAP Business One:
Windows 2000/2003
SQL Server 2000/2005(SP02)
SAP Business One - Version 2005A, 2007A
SAP DI API
CitiXsys Warehouse Management:
Windows 2000/2003
SQL Server 2000/2005(SP02)
Integration Server:
Windows 2003
SQL Server 2005(SP02)

Recommended: Internet Information Service 5.0 or above should be installed on the server where the reports would be hosted.

Have you attended an Inventory Pro or Warehouse Management Demo yet? If not, mark your calendar!

Every Friday till March 31, 2008 attend a live demo and learn how Inventory Pro - a paper based management solution can improve process efficiencies, increase productivity and enhance sales growth by accelerating inventory turns and improving goods availability. Or find out more about how you can get your orders shipped on time to the right customer, in the right cartons, with the right labels and documentation with a robust Warehouse Management Solution.

WEBSITE UPDATES

Business One Solution Set

CitiXsys has over the years built a solution set to address diverse business requirements of customers around the globe. At the heart of the solution set is SAP Business One, with CitiXsys products adding vertical and horizontal functionalities to address business scenarios. Our Business One solution set are focused on the following:

- ✓ Retail Management
- ✓ Warehouse Management
- ✓ Inter/Intra Company Financial Management
- ✓ Premium SAP Business One

The CitiXsys solution set can be deployed at organizations operating in any of one of the following landscapes:

Retail, Legacy Systems, SAP Business One, SAP Business One Premium, InterCompany, Warehouse Management and mySAP. The scenarios can include stand alone operations (Single layered) with the head office and operations at one location; single layered with head office and multiple location operations; or multiple layered with head office, regional office and multiple stores/locations. All product literature relevant to each Business One focus and deployment landscapes are available for download on the website. To learn more about the CitiXsys Business One Solution visit: www.citixsys.com/solution/overview.aspx

WHAT OUR CUSTOMERS SAID RECENTLY…

"I would like to take a moment to compliment CitiXsys team for having done an excellent job in implementing iVend at Reeves Floral Products. I have worked on several implementations in the past and have never worked with a group who were as eager and talented as your associates. Even with the time difference between India and the United States, there never seems to be an issue completing any development that arises. Thank you again for all your help."

- Chuck Woodring, Reeves Floral Products, Inc.

"At the beginning of this year, I would like to take this chance to thank your whole team for their hard work in the past year. Especially for Jai Prakash's (CitiXsys) work, I would say he is the best support technician I have ever seen. Specialized in aggressively scheduled project, he always solved the issue in a timely manner, performed follow-up steps to ensure the problem was solved. I am looking forward to continuing work with you team."

- Alan Fan, IT Manager, Great Lakes Tool on the CitiXsys iVend implementation.

"We needed a better system to support our company, so we went with SAP. Our retail shop also needed an easier, user friendly system which is integrated with SAP so we selected iVend Retail. We are now better able to track transactions through the system and can also create gift certificates on the fly."

- Angela Hahn, Finance Administrator, MiniJumbuk

TIP OF THE MONTH

CitiXsys Support

Did you know that CitiXsys provides three levels of support? CitiXsys has a dedicated Global Competence Center that serves as a primary service and support network for SAP Business One and CitiXsys partners and customers worldwide. The Center has the mission of supporting local and global markets, developing top-class solutions, and driving innovation and competitive advantage for SAP Business One. The Global Competence Center also provides proactive services and support such as remote consulting expertise for SAP Business One customization, project and design advice, application configuration, custom programming, and web services, to help ensure the optimum performance of the SAP Business One solution. CitiXsys also provides 24x7 technical support to partners and customers for any location and any time zone. This technical support includes both telephone and email support for SAP Business One and CitiXsys software solutions. Our support categories are divided into:

- ✓ SAP Business One Support
- ✓ CitiXsys Product Support
- ✓ Partner Support

If at any time you require any assistance, just send an email at: support@citixsys.com
Or call our Support Desk at:1-888-800-1291, 1-888-733-7131
