About CitiXsys

CitiXsys is a leading provider of software products in the Retail and Wholesale Distribution Supply Chain domain.

CitiXsys provides a series of cross industry and industry-specific software solutions to help businesses meet their changing needs. The organization's success is reflected in delivering solutions that offer security, reliability, availability and performance. CitiXsys also provides implementation, integration and customization services to its partners and customers worldwide.

CitiXsys' clients include globally recognized companies such as Swarovski Optik, Greiche & Scaff, Britannia, Wellborn Cabinet, Inc., Biotique, Colio Wines, Reeves, Margaret Howell, Sharks, Walrus Brands, Nestle Australia Ltd, Boss & Co, Alcan and many more.

CitiXsys is the recipient of the SAP Pinnacle Award 2008, a global recognition given by SAP to its most valued partners. CitiXsys received this award in the SME Global Innovation Partner category. In 2007, CitiXsys was awarded the ISV Partner Sales Excellence Award for Revenue and in 2006 the ISV Solution Partner Quality Excellence Award by SAP America, Inc., a subsidiary of SAP AG.

Customer/Partner Quotes

"As an engineering company we have many things to control, such as inventory, sales, procurement, and project management. We needed to synchronize operations across all our offices for all our employees.

We evaluated local software companies, but the feedback we got about SAP from other organizations was so strong and convincing that we had to have SAP.

A demonstration of the SAP® Business One application at a conference sealed the deal for the UEM team, and we were referred to CitiXsys, a global SAP Business One solution provider.

Anil Chauhan,
Company Secretary,
UEM Group,
CitiXsys Customer

CEO Speak

Greetings!

Despite the global fears of economic recession and a marked slowdown of economies in all of our regions, October saw healthy sales of CitiXsys products through the Channel and strong SAP sales to end users.

The results for October were only achieved because CitiXsys is uniquely positioned to help our users save money and enjoy higher returns on their investments through the depth and breadth of our solutions portfolio. In these challenging economic times we have enabled our end users to increase productivity with products such as Inventory Pro and Item Matrix whilst assisting our channel partners to achieve higher value sales through the use of these powerful Business One solutions with the lowest possible cost of ownership.

Once again my thanks to all of our partners and customers for your support throughout October. As always we will remain committed to delivering the best possible solutions and services to you all.

Best Wishes,
Kamal Karmakar

CitiXsys Product Webinar Series - (Asia Pacific Region)

CitiXsys Launches new Corporate Website

We invite you to visit the newly redesigned and enhanced corporate website at <http://www.citixsys.com>.

The new site present users with improved navigation and introduces a new Customers section. In addition to its fresh, new design, the site is now more easy to use and features full detail of CitiXsys' complete product line along with demos and other marketing collaterals.

A growing number of businesses and organizations are turning to Microsoft.NET to realize the benefits of Web services, which enable applications based on different hardware platforms, software languages and operating systems to quickly and easily communicate with each other. To facilitate companies utilize .NET technology for the development and deployment of Web service-based solutions, CitiXsys offers a Microsoft.NET Center of Excellence (COE). To read more about the newly introduced Center of Excellence, click [here](#).

8 Mid-Market and Growing Enterprises Go Live on CitiXsys Solutions in Just One Week

Globally, customer trust and confidence grow as 8 customers go live with CitiXsys Solutions in the third week of September 2008. Silicon Valley Sports & Entertainment (SVS&E), Robinson Luggage, House of Laptops, Swann Communications, Supreme Foods, North Street Cooling Tower, World Richman are a few customers that went live with CitiXsys solutions this September. CitiXsys' role at these 8 companies - competing in highly diverse industries - demonstrates the breadth and functionality that CitiXsys brings to the challenge of managing complex business processes across a wide range of vertical markets.

"It is imperative for an organization like CitiXsys to provide robust and quality leading solutions that work for clients and enhances the trust and confidence they have in us. With a growing global customer base, it is remarkable to note that CitiXsys solutions are being implemented across diverse business verticals, be it sports, entertainment, manufacturing or IT. In addition, these companies not only have diverse business focus, but also vary in terms of size, location and employee headcount. This in turn reveals the robustness and scalability of CitiXsys solutions that can be implemented for any growing enterprise irrespective of whether the company has an annual turnover of \$5 million or over \$500 million," said Duncan Wyeth, Vice President of Global Field Operations at CitiXsys."

Learn how CitiXsys has helped these 8 mid-sized and growing enterprises Go Live on SAP and CitiXsys' solutions!

New Customers

The following list of companies mentioned below have been selected to illustrate the diversity of companies that have selected a CitiXsys solution for their business. (This in no way indicate the complete list of new accounts acquired globally).

VSL International Ltd

VSL's experience in post-tensioning and related engineering goes back more than 50 years. VSL operates through 34 subsidiaries as a world-wide network, including two production facilities in Spain and China. With 2,900 employees, including 900 engineers and technicians, the group provides technical consultancy and support for the full range of works from project planning (development of preliminary designs, alternative design proposals) to complete final designs, construction engineering and on-site activities.

ProMax Systems, Inc.

ProMax Systems, Inc. became the recognized leader in custom configured, reliable high performance video editing and storage systems. ProMax provides a complete line of configuration, installation, and support services for the video industry. Since 1994, they have gained the experience that has earned the confidence and trust of their clients through top-notch service and putting the customer first.

Jackgreen

Jackgreen are the only licensed electricity retailer in Australia dedicated to reducing carbon emissions through renewable energy. Every product they sell is accredited by GreenPower, and every Jackgreen customer makes a contribution by reducing carbon emissions and combating the impact of climate change. With a growing customer base in NSW, VIC, SA and QLD, Jackgreen has already played a significant part in reducing emissions and raising awareness of energy-related climate change issues. Jackgreen is listed on the Australian Stock Exchange and is licensed by the New South Wales, Victorian, Queensland and South Australian Governments to retail electricity.

People Tree

People Tree

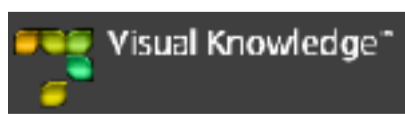

People Tree creates gorgeous garments and accessories by forming sustainable partnerships with Fair Trade and organic producers in developing countries. In order to ensure People Tree fashion meets the Fair Trade principles set out by IFAT (International Fair Trade Association), they work closely with 50 Fair Trade groups in 15 countries. So, People Tree's collections are all the more special because they make imaginative use of local skills (handwoven fabrics, hand screen printing and hand embroidery are used a great deal), which creates as much employment as possible in areas that really need it.

POS POS

POS POS has evolved into the leading value added distributors of point of sale and point of service technologies in Australia and New Zealand. POS POS is a privately owned Australian company with its corporate head office based in Brisbane, Queensland. POS POS also has branch offices in Sydney NSW, Melbourne VIC, Perth WA, and Auckland, New Zealand. POS POS provides value added services and support to their Australia wide network of resellers and alliance partners. This is done with both product distribution, and by offering a range of professional services that allow POS POS to facilitate all non-software components of a solution.

New Partners

Visual Knowledge Inc

Visual Knowledge creates fully integrated Web 3.0 development and execution platform for building semantic sites, semantic wikis, semantic blogs and high performance knowledge-driven applications. Visual Knowledge® has built an innovative 3D immersive platform for delivering deeply collaborative, ontology driven commercial multi-user games and online applications. The company processes semantics at scale comfortably with billions of triples in production hardened -- industrial strength semantic solutions. Their products are fully W3C Standards compliant (OWL, RDF, etc).

Accord Computer Systems Limited

Since 1980, Accord has been delivering high-quality IT solutions to enterprises in the small and medium sector. Their dedicated staff continue to provide innovative and cost effective "one stop shop" solutions for the various business requirements of the distribution and manufacturing sectors, providing their customers with the competitive edge they require.
